WHO WE ARE-

Kepler Engineering Services delivers advanced automation, electrical, and mechanical solutions for industrial applications. We collaborate with leading brands such as V&T, SIEMENS, ABB, SCHNEIDER ELECTRIC, DELTA, EMERSON, LS, ENDRESS+HAUSER, VEGA, and MITSUBISHI ELECTRIC to provide state-of-the-art technologies. Our tailored solutions for industrial and substation automation ensure precision, reliability, and efficiency.

With extensive experience in water and wastewater, oil and gas, food processing, pharmaceuticals, steel, plastics, and chemicals, we automate everything from single machines to fully integrated plants.

Our expertise includes modern control systems using PLCs, HMIs, SCADA, sensors, and actuators. By leveraging advanced technology and engineering know-how, we deliver cost-effective, user-friendly systems that minimize downtime and maximize value.

Industries We Serve-

- Edible Oil
- Food and Feed Processing
- Water & Wastewater Treatment (ETP, STP)
- Oil & Gas
- Power Generation (Renewable and Non-Renewable)
- Pharmaceuticals and Beverages
- Steel Rolling and Metal Industries
- Chemical Processing
- Textile and Garment Manufacturing
- Plastic and Polymer Manufacturing

WHAT WE OFFER-

Consulting Services

- Advanced control concepts for optimized processes and solutions.
- Comprehensive safety, security, and energy management strategies.
- Tailor-made solutions designed specifically for your plant's requirements.
- Expert energy consulting to enhance efficiency and reduce costs.

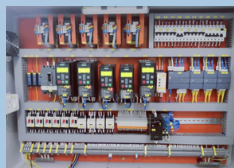

Engineering Services

- Expert automation project management for seamless execution.
- Partnerships with leading automation and equipment manufacturers.
- Comprehensive hardware engineering — from sensors and control cabinets to operator stations.
- Advanced software engineering — PLC programming, process visualization, SCADA, MES, and IoT integration.

Manufacturing Services

- Custom-designed control panels, motor control panels, and local junction boxes.
- Medium- and low-voltage distribution systems.
- Power Factor Improvement (PFI) panels and power compensation solutions.
- Advanced PLC panels, SCADA panels, and precision-engineered junction boxes.

Commissioning

- Commissioning – I/O testing and device calibration.
- Dry-run tests and plant control system commissioning.
- Process start-up.
- On-site production support.

IoT and Digital Services

- Seamless Integration – Secure connection of devices and platforms for real-time data access.
- Predictive Maintenance & Digital Twin – Analytics and virtual modeling to optimize performance and reduce downtime.
- Cybersecurity & Smart Solutions – Robust security with intelligent sensors, big data, and IoT applications for smarter operations.

Customer Service

- Preventative Maintenance & Emergency Support – Regular local maintenance and rapid response for urgent issues.
- Comprehensive Assistance – Online and on-site support for equipment breakdowns and troubleshooting.

Modernization & Retrofit

- PLC Upgrades – Transition from relay-based or obsolete PLC systems to modern PLC solutions.
- SCADA Modernization – Upgrade legacy visualization to advanced SCADA platforms.
- Retrofitting Services – Enhance existing systems with the latest technology for improved performance.

Substation Solutions

- Automation & SAS – RTU/relay configuration, SAS SCADA development, and energy monitoring with SAIDI/SAIFI reporting.
- LV/MV Substations – Design, supply, installation, and commissioning of substations (PFI, ATS, LT/HT panels) with repair services for transformers, VCBs, ACBs, and panels.

RECENTLY COMPLETED PROJECTS

“We take pride in delivering high-quality automation and electrical solutions that enhance efficiency, ensure reliability, and drive sustainable growth for our clients.”

BOOSTER PUMP AUTOMATION SYSTEM

We successfully delivered a complete PLC & HMI-based booster pump automation solution, including automatic pressure control, PID regulation, VFD speed control, pump sequencing and automatic changeover.

SILO & MATERIAL HANDLING AUTOMATION

We successfully delivered a complete silo and material handling automation solution, including conveyor and elevator control, motor sequencing, interlocking, and process monitoring.

BOILER & STEAM SYSTEM AUTOMATION

We upgraded the existing boiler system with an integrated automation and monitoring solution, including burner control, electrical control, safety interlocks and process instrumentation.

RECENTLY COMPLETED PROJECTS

PRODUCTION LINE AUTOMATION

We successfully automated the existing production line by integrating conveyor control, machine sequencing, motor control and coordinated process operation for improved efficiency and reliable performance.

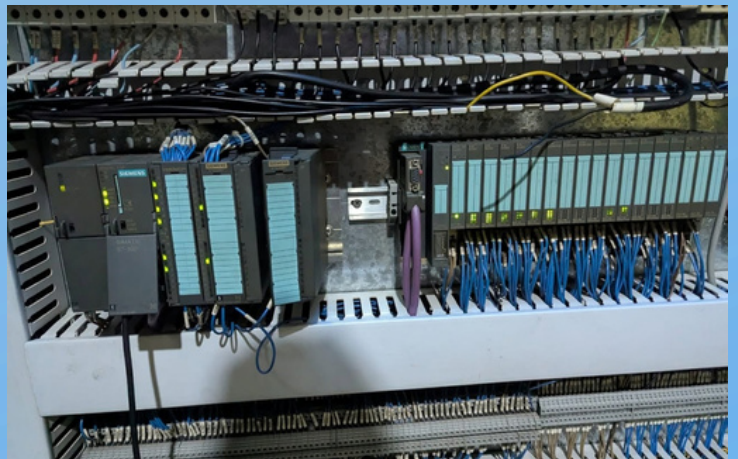

VFD & MOTOR CONTROL PANEL

We designed and wired VFD-based motor control panels and developed the required PLC/VFD control programming for various industrial applications.

ONLINE SCADA INTEGRATION

We upgraded and developed the existing PLC control system and integrated an online SCADA system for real-time process monitoring, control and data visualization.
